

Photon Delta

Mr. Carol de Vries, Program and technology manager
Mr. Eric van Geest, General Manager (PITC)

PhotonDelta

- Dutch-centered Industry Builder and Growth Accelerator on Integrated Photonics
- Objective: Establish a fast-growing Integrated Photonics industry cluster covering the whole value and supply chain
- Leveraging 236M€ for support and equity/loan investments in start-ups/scale-ups/SMEs
- Growing ecosystem of more than 20 companies and institutes and international cooperation
- Driver of the global IPRS-I roadmap together with MIT

EFFECT Photonics raises \$37M to develop single-chip coherent optics and scale production
11th of March 2021

PHIX welcomes new investor PhotonDelta
7th of October 2020

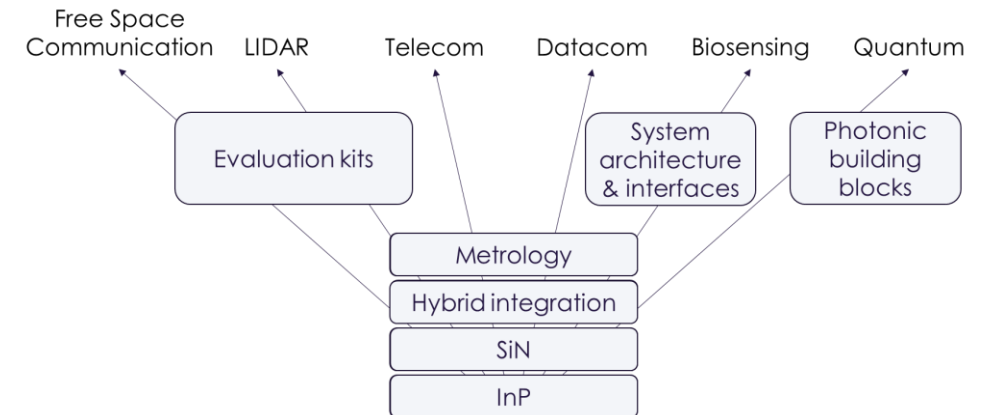

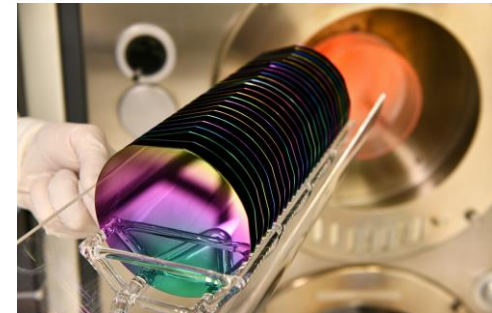

New investment in light-powered biosensor accelerates the availability of high quality – low cost tests for early detection of cancer, Covid-19 and other diseases
27th of May 2021

PhotonDelta – PITC

- Technology Center, founded in 2021 by Eindhoven University of Technology, University of Twente, TNO and PhotonDelta
- Bridge the gap between academic research and industrial application
- Speed up the technology & application development through Shared Research Programs
- Lower the threshold for companies to embark on Integrated Photonics by providing access to advanced facilities

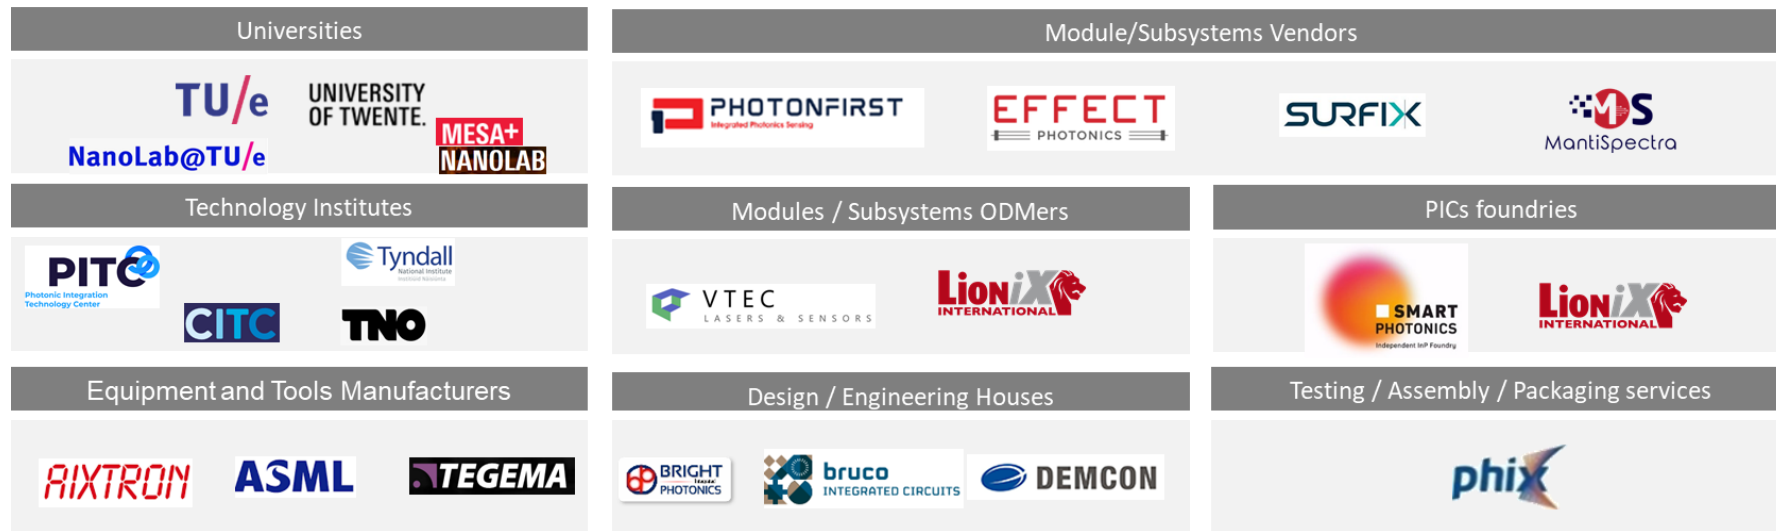

New Technology Centre To Accelerate Digital Innovation With The Power Of Light

Wednesday 26th May 2021

PhotonDelta – Ecosystem

- Cohesive cluster for the design, development and manufacturing of customized PICs and PIC-based modules, leveraging InP and (hybrid) SiN-based technology platforms

- Several companies in the industry cluster have supplier or customer relations in Japan
- Collaboration will stimulate the growth of Photonics & application domains in both countries
